Town Clerk: **Joy Norris**

9 August 2013

Dear Councillor

A meeting of the Town Council which you are summoned to attend will be held on Thursday 15 August 2013 in the Council Chamber, Council Offices, North Street, Ilminster starting at 19:30hrs.

The business to be transacted at the meeting is outlined on the Agenda below. Any reports listed as "to follow" will be made available as soon as possible, and in any event at least 30 minutes before the start of the meeting.

Yours sincerely

Joy Norris
Town Clerk

AGENDA

1. **Apologies for Absence**
To receive apologies for absence from Councillors unable to attend the meeting.
2. **Declarations of Interest**
To receive any declarations from Councillors and Officers of interests in respect of matters to be considered at this meeting, together with an appropriate statement regarding the nature of the interest.
3. **Ilminster Football Club – Erection of Dugouts**
To consider a request from Ilminster Football Club to erect dugouts / trainers huts to meet the requirements of the Somerset County League.
4. **Replacement of Stiga Grass Cutting Machine**
The Council Stiga grass cutter caught fire on 8 August and the resultant damage makes it beyond economic repair. The Council is asked to consider purchasing a replacement. This machine is included in the Council's budgetary provision for replacement equipment. Information on the possible insurance claim and the replacement costs will be provided at the meeting.

Mulching is the future

Mulching lawnmowers recycle grass clippings by finely cutting and re-cutting the grass, hiding cuttings within the standing grass to wilt and decompose thereby feeding the soil.

Quick Overview

The Park Pro 16 4WD fully articulated front cut Combi mower is fitted with a twin cylinder Briggs & Stratton Vanguard engine which will power the full range of Stiga cutter decks with manual or electric height adjustment control.

Description	Specification	Recommended	Related Products	Review
-------------	---------------	-------------	------------------	--------

The Park Pro 16 4WD is fitted with a twin cylinder Briggs & Stratton Vanguard engine with a displacement of 479cc the engine develops 9.4KW. This engine will power the full range of Stiga cutter decks with manual or electric height adjustment control. The high spec 4WD transmission system has a separate 10 litres per min hydraulic pump delivering a full speed of 11KPH through the heavy duty Kanzaki transaxles to the large 17" front and rear wheels. The PTO clutch is electro magnetically controlled; the fuel tank capacity is a massive 14 litres.

The machine is fitted with a single lever adjusted, high back comfort seat fitted onto parallel suspension, mechanical servo steering, a single LED headlight and an hour meter to record working hours for servicing.

Imagine driving around your garden effortlessly creating a perfectly clipped healthy green lawn, no longer restricted to driving up and down in straight lines, scuffing up the ground turning on the same areas and wasting fuel and time collecting grass clippings that will sit in an unsightly rotting pile at the bottom of your garden.

Imagine easily coping with soft wet ground conditions on a flat or sloping garden, manoeuvring quickly around all sorts of obstacles without worrying about your rear wheels dropping off the edge of the lawn or catching the back of your tractor on fences, trees or even your new greenhouse.

Imagine being able to trim under overhanging shrubs and into corners because your Multiclip cutter deck is positioned at the front of the machine where you can always clearly see it and it cuts the grass before your wheels have a chance to lay it flat. Only a 4WD Stiga Park Pro 16 can provide you with such an enjoyable way to maintain and improve your lawn and paddock areas, turning this chore into a 'Drive in the Park'.

Stiga's unique articulated chassis design ensures that the rear wheels follow exactly in the path of the front cutter deck. This is because the chassis pivots at the centre point of the front and rear axles leaving you free to concentrate on looking forward at the grass that you're about to cut rather than worrying about the obstacles that you have just passed. The articulated chassis design also means that the simple and effective 4WD system eliminates any tyre scuffing on your lawn whilst turning as well as ensuring excellent traction in wet conditions and on sloping ground.

The first thing that you should consider when selecting the correct 4WD Stiga Park for your needs is the type of cutter deck you require, as this will determine the minimum power requirement for your particular machine. If you are concerned about access through gateways or narrow paths then add 10cm to the cutting width of the deck, this will be enough to allow you to drive your machine through the gate

easily.

For formal lawn areas with an occasional requirement for long grass cutting, for example cutting down longer grass after daffodils have flowered, our 95cm and 105cm 'Multiclip Combi' decks are ideal. If you need to regularly trim roadside verges, paddock/orchard areas or just have a large amount of mowing to do then our 110cm or 125cm 'Pro Combi' would be more suitable. The 'Multiclip Combi' cutter decks can be used on all of our 4WD Stiga Parks and the 'Pro Combi' cutter decks should be used on models fitted with twin cylinder engines.

Stiga have been building mowers since 1974 and all models are designed with functionality, reliability, comfort, quality and the environment in mind.

Built today for tomorrow, all models come with a 3 year warranty on the mower and a 10 year warranty on the chassis.
