

Recommendations From The Play And Paths Group

Regarding The Wharf Lane Recreation Ground Play Area

1. That public consultation is undertaken on the draft play area plan (as attached) and the results reported back to the Town Council together with a final masterplan for approval.
2. That as the skatepark is fixed and cannot be moved (unlike the other pieces of equipment shown in the draft play area plan) that element of the play area plan is approved. The suggested planting and positioning of the equipment has been designed to alleviate the conflicts reported to the Council by various user groups.
3. That quotations are obtained for implementing the skatepark module of the play area plan.
4. That South Somerset District Council is formally asked to consider release of S106 money for the Skatepark module project.
