

## **The skate park at the recreational ground in Ilminster**

Greetings.

The young people are grateful that the skatepark had a renovation and has increased in size. There are however improvements that the young people feel would make their experience more enjoyable and safer. The young people think that the priorities in improving the skatepark are:

- Sanding the skate park to make it less slippery
- Install small drains to get rid of the puddles
- Put a fence around the skate park to prevent little kids from potentially putting themselves in danger

Fundraising for the above improvements, could be a joint partnership between StreetSpace and the council. StreetSpace is hoping to raise some funds through 'rampfest' on June 8<sup>th</sup>. We have other ideas as to how to raise funds, which I would be happy to discuss in person. We are also helping that the council may be able to help fund this endeavour.

I am aware that the council owns the recreational ground and so any improvements that the young people want to implement will have to gain approval.

Kind Regards,

Ryan Doeller
